

S JAYASANKAR RAJU

Senior Data Scientist – Finance

Analytics and data science professional with 13+ years of experience designing, building, and deploying machine learning and forecasting solutions across finance, operations, and HR functions. Skilled at partnering with cross-functional business, technical, and finance teams to translate complex processes into robust data engineering pipelines and predictive models that drive measurable, actionable outcomes.

PROFESSIONAL EXPERIENCE

Senior Data Scientist | Syngenta | Jul 2022 – Present

- Led a high-profile finance data science initiative tracing customer invoice payments from bank accounts to internal company records, improving visibility of cash inflows, outflows, and related forecasts.
- Partnered closely with Finance, Treasury, and IT stakeholders across teams to understand existing invoicing and payment processes end to end, translating business requirements into scalable, automated data pipelines and reconciliation logic.
- Successfully designed, built, and deployed the solution into production, earning strong recognition from senior stakeholders for its accuracy, transparency, and business impact on cash flow visibility.
- Architected and deployed an enterprise forecasting platform used by 90 geographies worldwide to generate Accounts Receivable and Accounts Payable forecasts using a range of advanced time-series techniques, with further use cases in the pipeline.
- Defined data science standards and best practices for the team, taking technical ownership of the delivery of all ML projects.
- Implemented MLOps practices to streamline and accelerate solution development across the team.
- Mentored and guided junior data scientists, supporting their technical growth and successful delivery of projects.

Associate Principal Consultant | Arcadis Design & Consultancy | Apr 2019 – Jul 2022

- Scaled the initiative from a single-person proof of concept to a 10-person cross-functional development and data science team, growing the project into a multi-million-scale initiative for the client.
- Designed an optimization solution to manage drainage assets across the UK rail network, enabling optimal asset selection and reducing overall risk of asset failure.
- Designed and deployed machine learning models to predict project loss-making risk, attrition, and other automation use cases, reducing manual effort through AI-driven processes.
- Delivered classification, regression, and forecasting solutions, with a strong focus on finance-related business problems.

Lead Data Scientist | Talview | Mar 2019 – Apr 2019

- Developed a process that reduced candidate hiring time from 74 days to 36 days.
- Designed a campus recruitment strategy that cut recruitment costs by 58% and reduced time-to-hire from four months to one month.

Advanced Financial Analyst | Ernst & Young | Oct 2017 – Feb 2019

- Led end-to-end design, development, and deployment of machine learning models, managing a team to generate monthly results and automate the deployment process.
- Developed an optimum routing model that minimised the number of cabs required to transport all employees.
- Developed and deployed ML models to forecast revenue and predict the probability of winning bids.

Associate – HR WI COE Analytics | Cognizant | Feb 2013 – Oct 2017

- Developed machine learning models to predict employee attrition and forecast headcount.
- Applied NLP techniques, including topic modelling and sentiment analysis, to employee satisfaction survey data.
- Conducted inferential analysis on new joiner exits

CORE SKILLS & TOOLS

Languages & Platforms: Python, R, SQL, Docker, AWS SageMaker, Databricks

Analytics Tools: Excel, Power BI, Alteryx, KNIME

Statistical & ML Methods: OLS, Non-linear and Logistic GLMs, Factor Analysis, Principal Component Analysis, Conjoint Analysis, Discriminant Analysis, Regression & Classification Models, Hypothesis Testing (Chi-square, ANOVA, MANOVA), SARIMAX, ARIMA, Holt-Winters, Exponential Smoothing, Convolutional & Feed-Forward Neural Networks

EDUCATION

B.Tech, VIT University — CGPA 7.97

Certification in Business Analytics (PGP-BABI), Great Lakes Institute of Management (GLIM)

ACHIEVEMENTS

- Star Contributor Award, Arcadis
- Extra Miler Award, Ernst & Young
